

22S:30/105, Statistical Methods and Computing
Spring 2013
Instructor: Cowles
Information on Final Exam

- The final exam will be given Tues., 5/14, at 8:00 .m., in 1505 SC (Seamans Center).
- The final is cumulative. All material mentioned in the descriptions of the midterms could also appear on the final.
- There definitely will be questions on material covered since Midterm 3. This includes regression and nonparametric methods (sign test, Wilcoxon rank sum test, Wilcoxon signed rank test).
- Questions will be mostly short answer and multiple choice. Some will involve interpreting SAS output that I will provide.
- You may bring:
 - up to four 8-1/2 x 11 sheets of paper with your own notes (the three from your midterms, plus one more)
 - the normal, t, chi square, and random digit tables from your textbook
 - a calculator
- Short answer questions and interpretation of computer output will be similar in style to homework problems. Doing unassigned textbook problems would be an excellent way to prepare for the exam.
